A hand-drawn sketch of a dog's head facing left. A thought bubble originates from the dog's brain area, containing a list of questions:

- Bark Overflow
- In search...
- Why is my dog...? Resolved
- Can my dog eat...? Unresolved
- ...?
- ...?
- ...?

The drawing is done in black ink on white paper, with some blue ink used for the thought bubble outline and the question marks.

A hand-drawn wireframe sketch of a mobile application interface for reviews. The top section is labeled "Reviews". Below it is a search bar with a magnifying glass icon and the word "Search". Underneath the search bar is a section titled "Filter by:" with a dropdown menu showing "Pet". Below the filter are two buttons: "grooming" and "day care". The main area contains three horizontal rows, each representing a review. Each row has a small square icon on the left, followed by a rating of stars and a wavy line underneath. The first row has a single star and a wavy line. The second row has four stars and a wavy line. The third row has two stars and a wavy line.
