

Create profile

- bone to show progress
- dog bites off bone as you progress.
- logo should go somewhere.

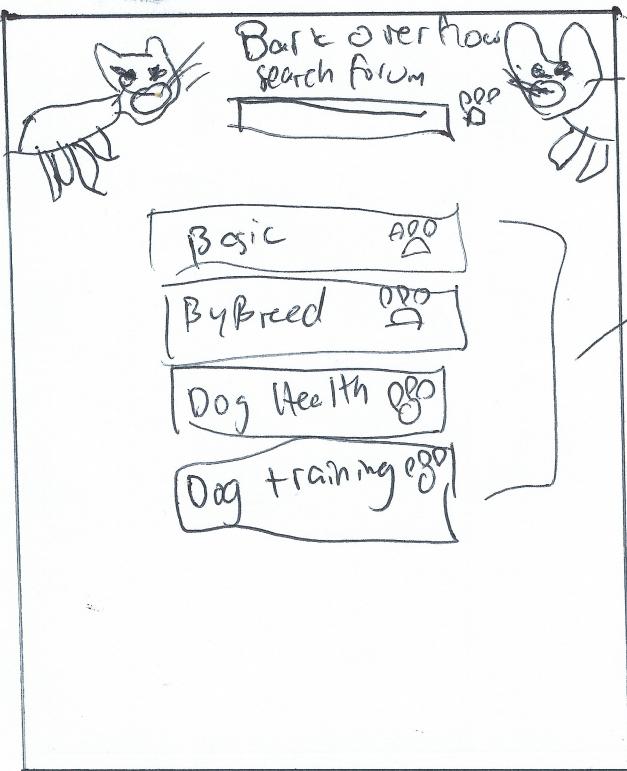

- walking your dogs animation
- select building to go to that page.

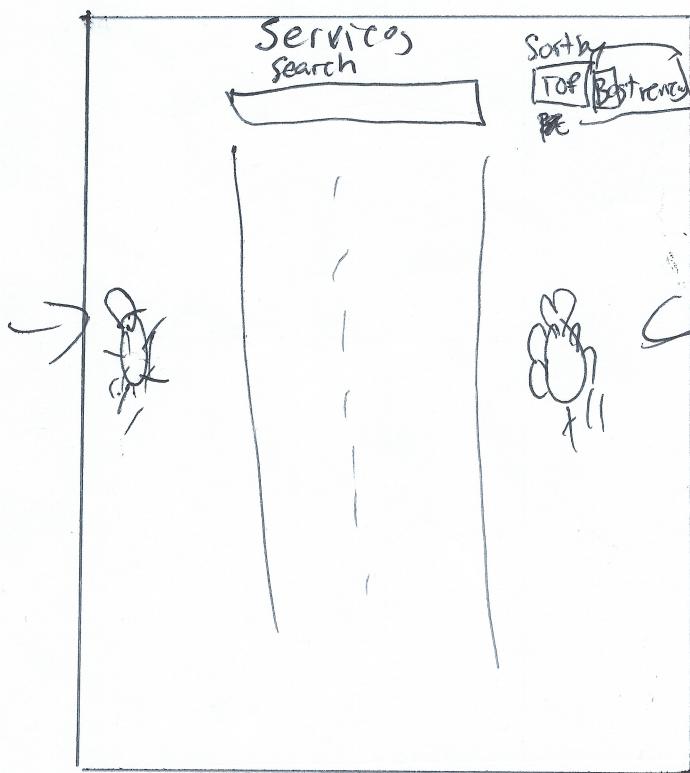

Events.

- search bar to search
- filter by newest / most anticipated

→ show events here.

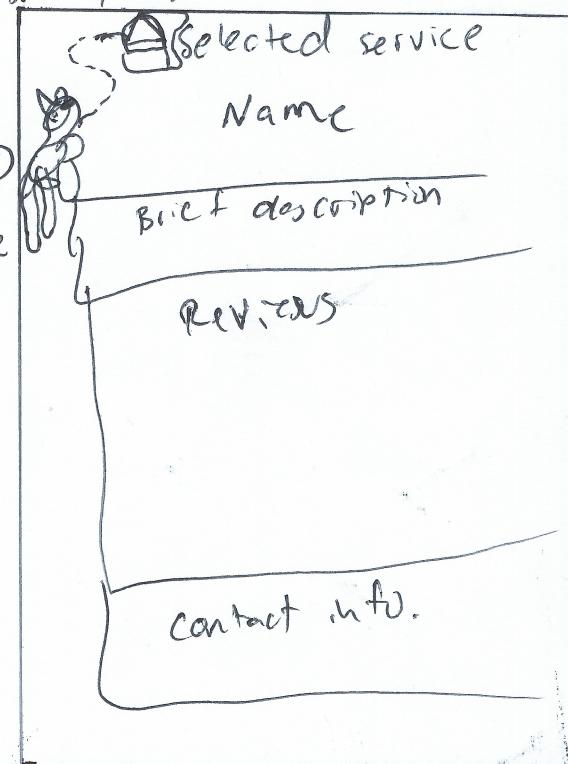

- Barkipedia
- bark overflow
 - search in forum
 - filter

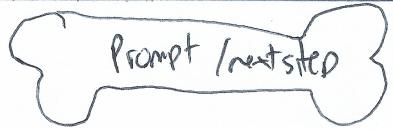

Service

- search, list generate.
- as you scroll, dogs run

click
dog to
show
service
on
google
map.

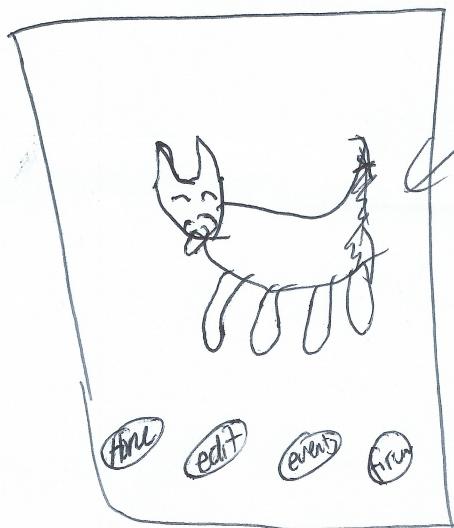

Profile creation / page

- ← click to add info on your profile
- also, dog eats the treat when you finished the specific prompt
- dog running
- sees bones in the distance

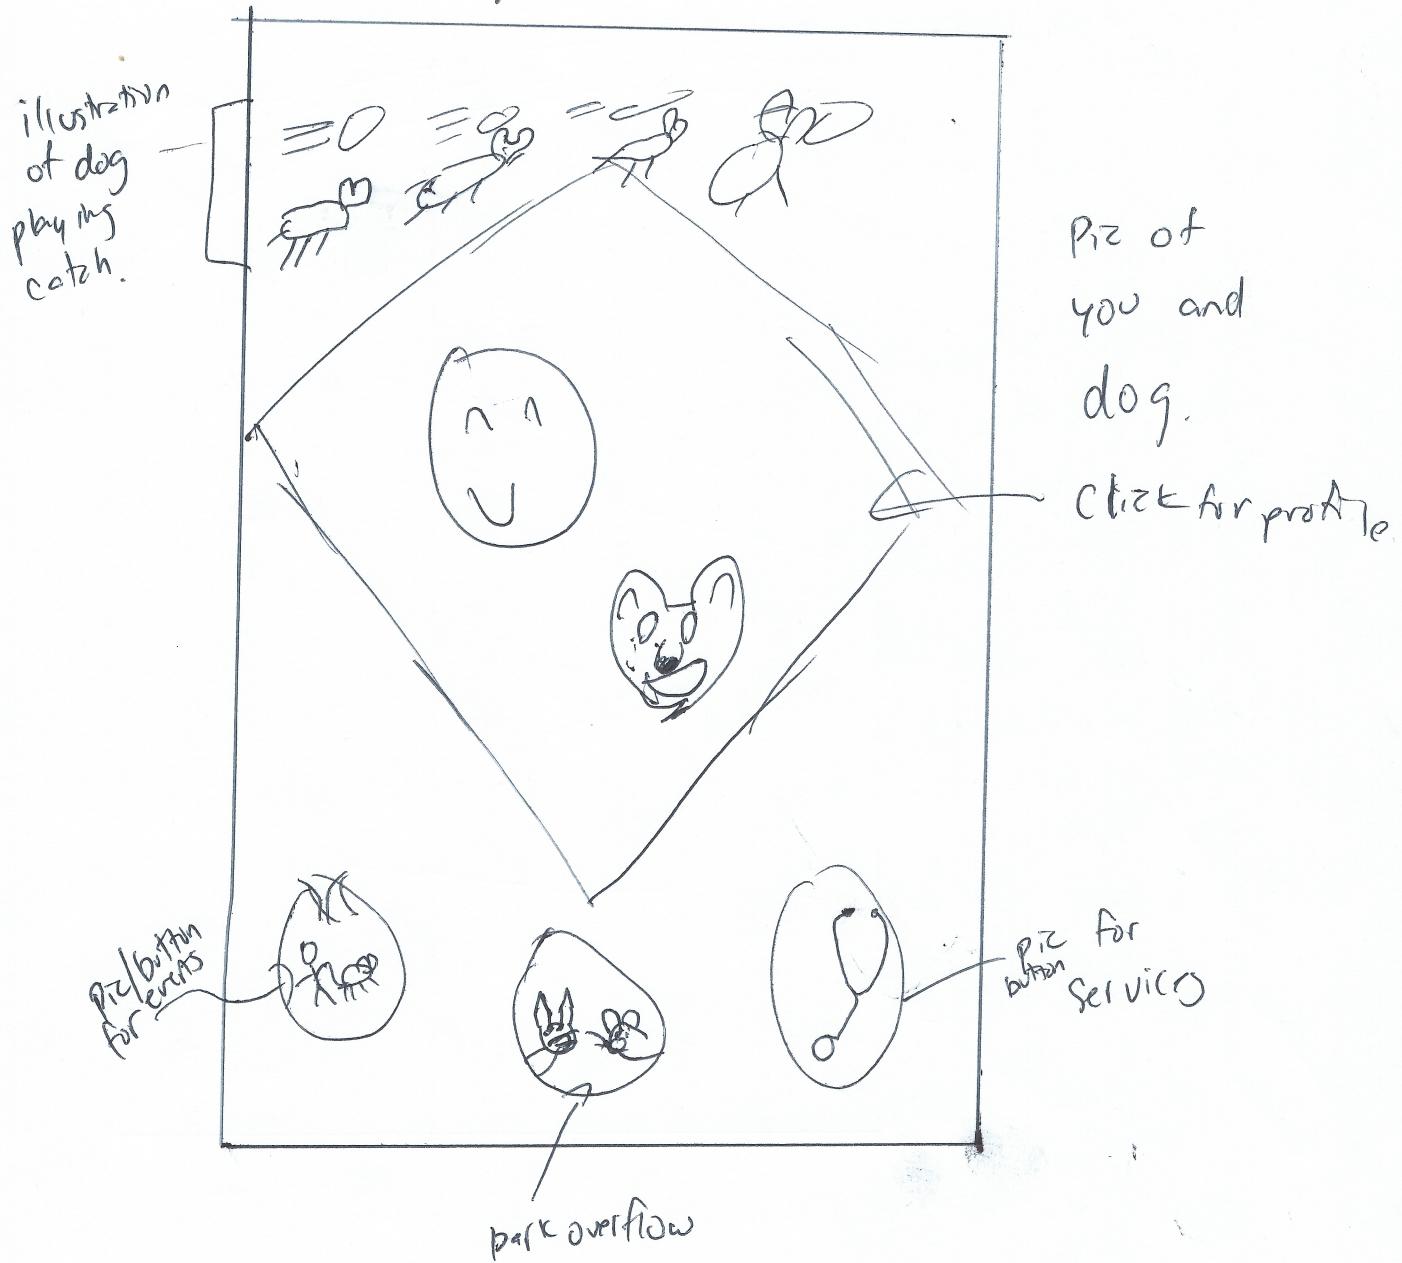

when done

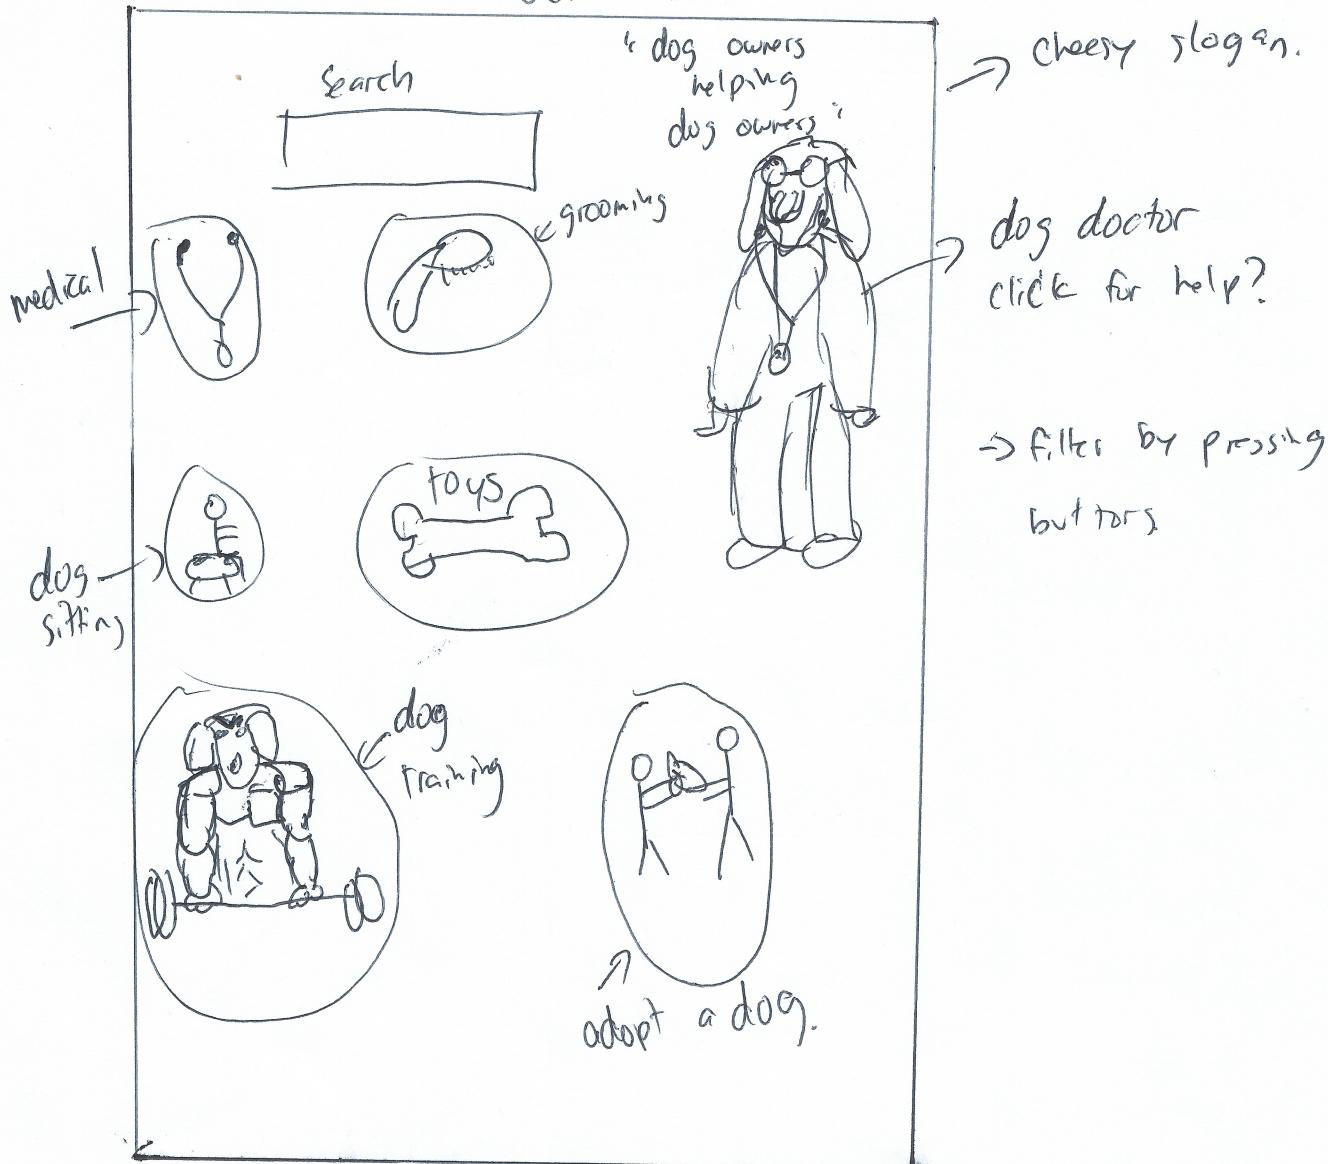

dog can be standing, rolling around, running in circles chasing its tail etc etc.

these are frisbees.
select one and you throw
and dog catches

Home Page > very basic

Services.

Bark overflow

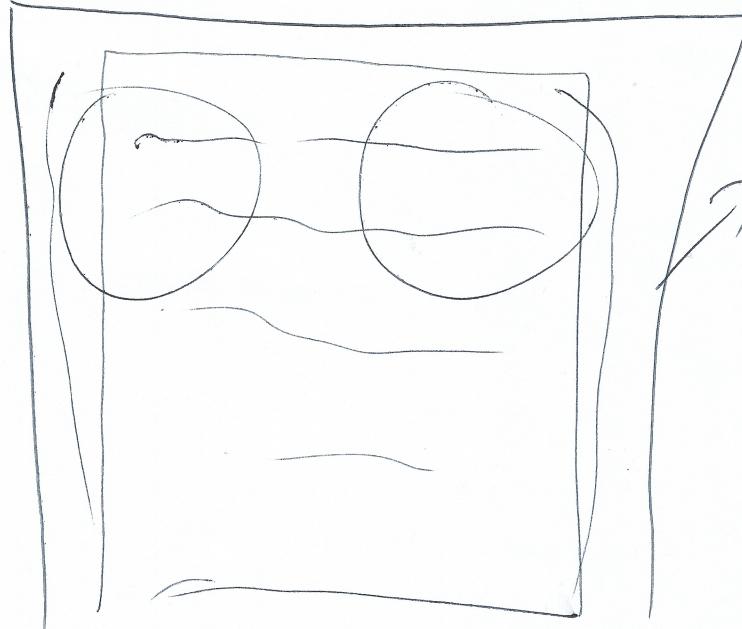

→ dog w/ glasses

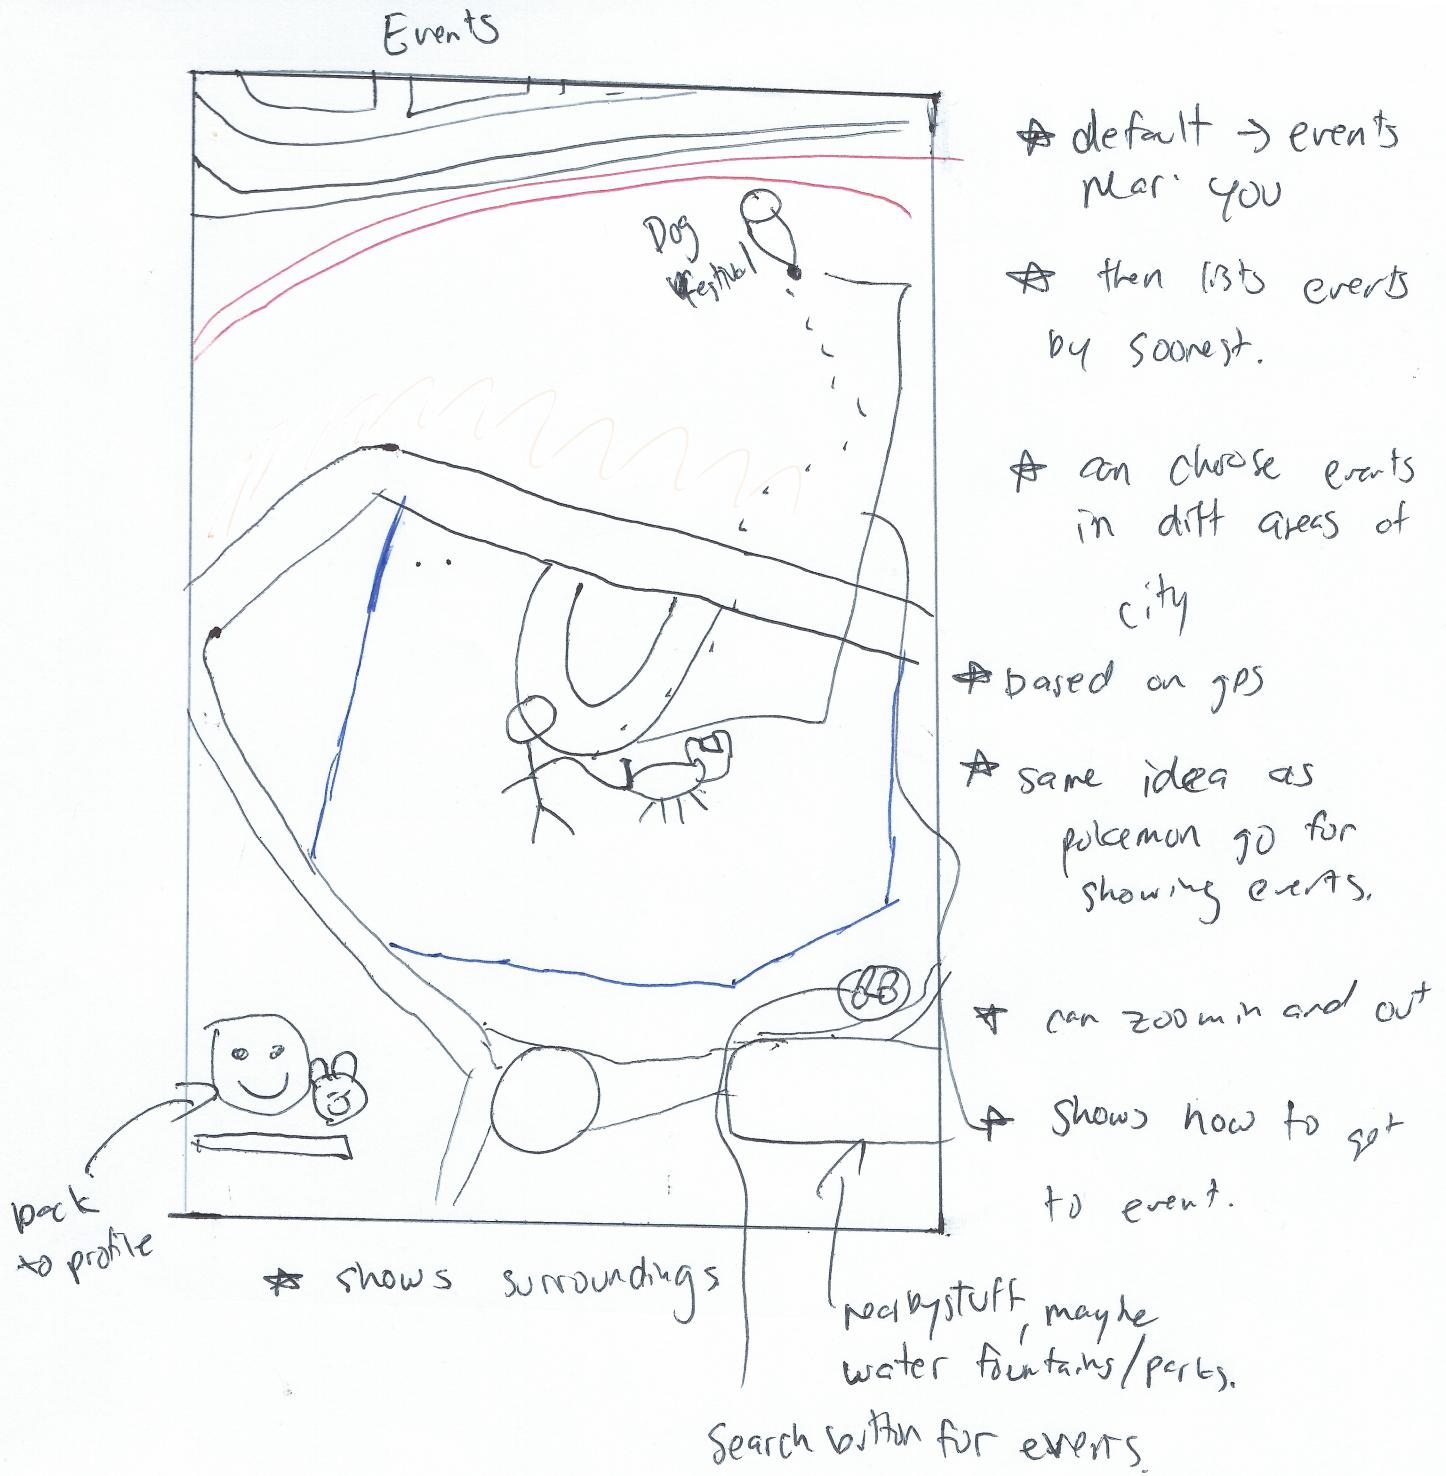

on as
background!

→ search button.

results.

results pop up
over background
image,
dog still kind
of visible.

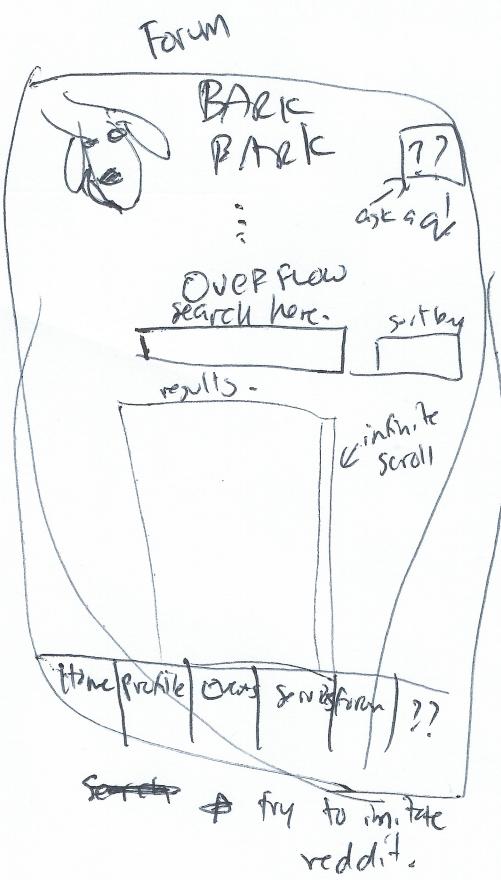

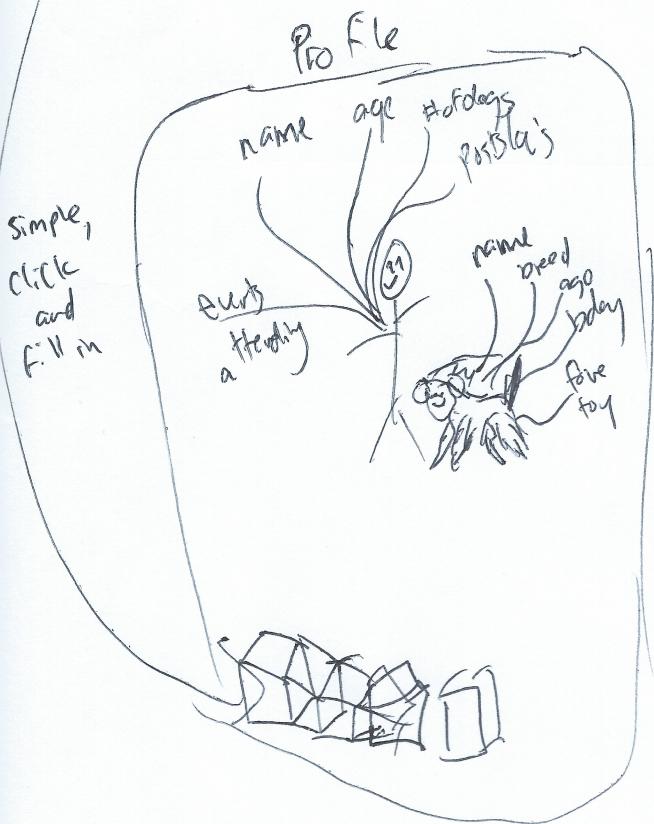

Barkipedia sketch set 3.

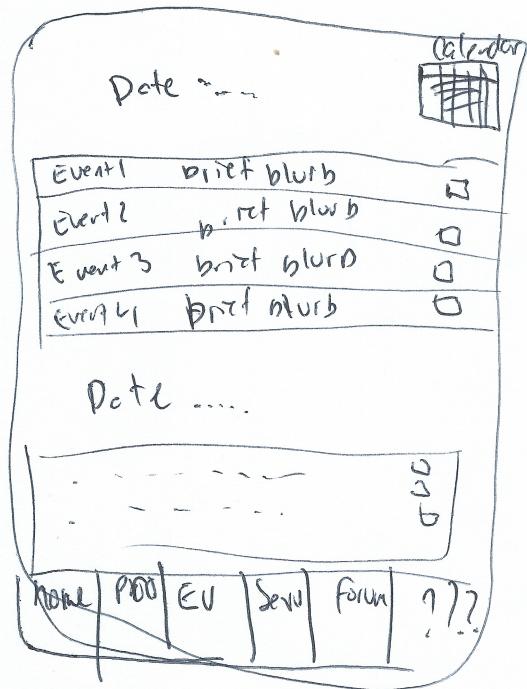

Idea → Same format each page
swipe left or right to change

← Choose and dog goes.

Events

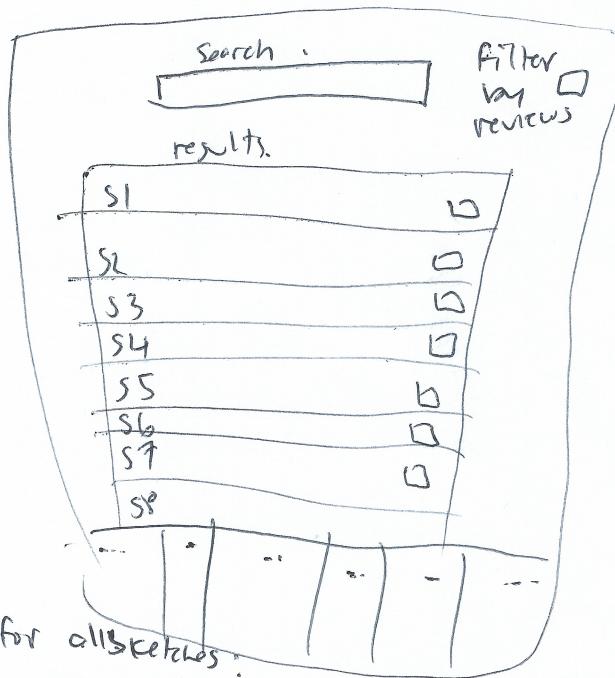

Basic too.

scroll to view.

click button
